Operating Systems	Windows, Unix/Linux, AS/400 (IBM System i)
Database	MySQLi, Oracle
Software Tools	Visual Studio, Clients (SSH, PuTTY), Oracle, Android Studio, Microsoft Office, Eclipse

Education

Computer Programming Diploma Program

Seneca College, Toronto (expected to graduate on September 2017)

May 2016 – Present

Academic Projects

My Grade Tracker:

- Android App that allowed the user to enter student id's and grades.
- used persistent storage to remember user choices and entered data.
- They showed up in the ListView, and were also saved in an SQLite database.

Wedding Planning Application:

- Using C++, developed a console application that keeps inventory for various items, including their price and date of delivery.
- Items could be added, deleted, or ordered using a menu.
- Worked with interfaces and abstract base classes to implement different features for the application.

Data Storage and Extraction:

- Using PHP, developed a web form that validates input fields and stores them in MySQLi database. Users are then able to view and delete specific rows from the table.
- Developed a form that takes the user's input to select a range rows from a table according to input constraints.

Windows Server Installation:

- Installed and configured Windows Server on a hard drive.
- Using the GUI, PowerShell, and the Command Prompt, added and removed server roles, enabled DHCP, and worked with TCP/IP properties to configure network settings.
